🪪 Profile

Experienced Developer proficient in optimizing SQL queries for efficient data processing and database performance. Skilled in designing and implementing ETL processes, data transformations, and integration solutions using Ab Initio. Additionally, experienced in crafting robust shell scripts to automate tasks and streamline workflows. Proficient in leveraging Power BI to create visually compelling dashboards and reports for data-driven decision-making.

💼 Professional Experience

Wipro Limited   02/2020 –
Project Engineer | ETL | DevOps | SQL Developer   present
- I have worked on Ab Initio ETL tool as a tool to process   Greater Noida,
  client side information and provide valuable insights   India
  regarding the data.
- My other responsibilities involved interacting with
  cleint.
- Extensive experience in designing and parameterizing
  graphs, scheduling jobs through Control Centre, and
  proficiently scripting Unix shell commands for ETL
  optimization.
- Designing Ab Initio graphs to transform, cleanse, and
  enrich data based on business requirements.
- Monitoring ETL job execution and addressing any issues
  promptly to minimize data processing delays.
- Created shell scripts to automate monitoring of critical
  server metrics.
- Automated monitoring of continuous jobs through shell
  scripts.
- Leveraged tools like Grafana, Control Center, Query>it,
  and SQLExplorer for operational efficiency and streamlined
  processes.
- Appointed as L2, providing guidance and technical
  assistance to L1 teammates within the operations team

Cosmo Info Solutions   06/2019 –
Frontend web developer   11/2019
- Skilled frontend developer proficient in HTML, CSS,   Lucknow, India
  JavaScript, and ReactJS.
- Experienced in designing eye-catching landing pages to
  boost user interaction.
- Expert at creating user-friendly interfaces that adapt
  seamlessly across devices.
- Committed to achieving polished designs and staying
  updated with web development trends.

🧠 Skills
